The Job

> A seat with the Blacktop Sisters is not bought. It is earned with a first run, made with medicine, to somewhere nobody else will go. Big Annie Dufresne has a crate of fever cure, a town called Ashby Halt that has shut its gate on a sickness, and a prospect of her own who needs a crew to ride with her. She will lend a truck. She points west, where the horizon has turned the colour of tea, and says the load is signed for.

THE TRUTH

What Really Happened

Ashby Halt is two days out, off the Truce, with plague inside the wall. The load is real and so is the need. What Big Annie has not said is that this is the third truck she has sent. The first two came back empty: one robbed by raiders who knew exactly which truck to stop, one turned away at the gate by townsfolk who had been told the Sisters' medicine was what made them sick.

Someone is selling the Yard's dispatch sheets to a Firebrand band, and the same someone has been spreading the rumour at Ashby Halt, because a town that dies owing money is a town whose well and walls can be bought cheap by the Ledger House holding its debt. The seller is one of the Yard's own mechanics.

The run itself is the test. There is a dust storm coming that will blind the Road for hours. The truck has a fuel line that was loosened before it left the bay. The prospect, Jo Ferrant, is seventeen, a brilliant driver, and will not turn back for anything, which is exactly the instinct that kills people out here.

WHO'S WHO

The Cast

ROAD-CAPTAIN OF THE BLACKTOP SISTERS

Big Annie Dufresne

Six foot one, one eye, never late. Says very little and all of it is true.

SECRET

She knows someone in her Yard is selling her. She is sending strangers because she no longer knows which of her own people to trust.

THE PROSPECT, DRIVING

Jo Ferrant

Seventeen, fearless, funny, drives like water. Has never been afraid of the right thing.

SECRET

Her mother is inside Ashby Halt. She has not told Annie, because Annie would have sent someone else.

BAY MECHANIC WHO FUELLED THE TRUCK

Wick

Cheerful, grease to the elbows, always the first to help. Asks which way you are headed.

SECRET

She sold the dispatch sheet and loosened the fuel line. A Ledger House factor holds her brother's debt and offered to forget it.

WHERE IT HAPPENS

The Locations

01

Service Bays

Six working bays behind a wall of stacked trailers, smelling of fuel and hot metal.

What happens here. The truck is loaded and checked. A crew that inspects it before leaving finds the fuel line; a crew that does not finds out a day later, between towns.

02

Stretch of the Long Road

Cracked asphalt under a sky going brown, with the wrecks pushed to the shoulders.

What happens here. The storm and the ambush. The raiders are waiting where the road dips, and the storm front arrives at the same place an hour later.

03

Settlement Gate

A killing ground between two walls of scrap, with a watch platform and a painted warning.

What happens here. Ashby Halt. The gate is shut, there are rifles on the wall, and the people behind it believe the cure is the sickness.

HOW IT PLAYS

The Scenes

1 EXPLORATION ●●○○ MEDIUM

The storm. A DC 12 check reads it an hour out. Drive through it and the engine chokes on a failed check, with the fuel line already weeping. Shelter and lose half a day, with water for exactly the journey planned. Without goggles and masks, the saves begin.

2 COMBAT ●●●○ HARD

The dip in the road. Firebrand riders come out of the dust on both sides, knowing which truck and what it carries. They want the crate, not a fight, and will burn the truck if they cannot have it.

Opposition: Firebrand Rider *(full stats in the gallery)*, Raider *(full stats in the gallery)*

3 SOCIAL ●●○○ MEDIUM

The gate at Ashby Halt. Frightened people with rifles, a rumour, and plague-bearers already loose in the lower street. Someone has to prove the medicine is safe. Jo's mother is on the wall, and she is coughing.

Opposition: Plague-Bearer *(full stats in the gallery)*

Ride-By. While mounted, moving out of reach does not provoke attacks.

EVERY CASE CLOSES SOMEHOW

How It Can End

I

Deliver the load and bring back the name. Ashby Halt lives, Jo gets her seat, and Big Annie walks Wick to the middle of Halfway Bridge to talk about it.

II

Deliver the load and say nothing of the fuel line. The town lives, the Yard's leak goes on, and the next truck to be stopped is the crew's own.

III

Turn back at the storm. Everyone lives, the crate is intact, and Ashby Halt's gate is found standing open nine days later. Annie signs the load back in herself and does not look up.

These are the likely ends, not the only ones. When your table finds a fourth, let it.
